

few months after the debut of our ambitious 2021-2025 sustainability impact program, the level of engagement of our employees, partners and customers is at an all time high, setting a solid foundation for success.

Already 91% of our top suppliers have registered to "The Zero Carbon Project" launched in April to support them in halving their carbon emissions by 2025. With this initiative they will benefit from our unique experience and expertise, trainings, tools and solutions for efficiency and sustainability.

At the same time, our sustainability consulting services keep attracting more and more customers in need of climate change and supply chain decarbonization advisory services and digital solutions to accelerate their own transformation. Since 2018, Schneider has helped them save and avoid 302 million tons of CO₂ emissions and we can be proud of passing the bar of 10,000 MW clean energy managed for our PPA clients.

Internally as well, 100% of our employees are undergoing sustainability training, which combined with the fact that 81% of them feel confident in reporting unethical behavior will be a key pillar of trust and empowerment we need to deliver on our purpose and our targets.

At local level, progress is also real as we validate 200 local commitments made by 100% of our Country and Zone Presidents.

The many accolades we received this quarter, from the Energy Star award to Gartner's top supply chain ranking and employer recognitions only comfort us in our action and world's most sustainable corporation ranking (Corporate Knights 2021).

Yet, it is not enough. Our 2030 decarbonization scenarios show that the world needs 3-5x more effort to limit global warming to 1.5°C, which is why we need to keep bringing everyone along the journey to a climate positive and inclusive world, do our part and always go beyond.

Olivier Blum
 Chief Strategy & Sustainability Officer,
 Schneider Electric

Methodological note

Schneider Sustainability Impact (SSI), is Schneider Electric's continuous improvement process to deliver outstanding sustainability performance, in line with our business strategy. Progress is measured against a 2020 baseline, except for two programs measured against a 2019 baseline to mitigate COVID -19 impacts (#1 green revenues and #10 opportunities for the next generation).

The SSI provides, on a scoring scale of 10, an overall measure of the Group's progress on its sustainability goals. This is done by converting each KPI's performance on a 10-point scale, considering that base year performance receives a 3/10 score, and the 2025 objective translates in a 10/10 score. For each KPI, the relevant score is obtained by linear interpolation, and rounded down to the second decimal. By construction, the score of an indicator cannot exceed 10/10, and cannot be lower than 0/10. The overall score of the tool is the average of each KPI's score with equal weight (11 Global KPIs, excluding the Local KPI). An external auditor provides a limited assurance on the KPIs of the SSI once a year – including the review of the methodologies and processes used to consolidate the different KPIs.

Each year, the SSI performance impacts short-term incentives for the Group's executives and about 58,000 eligible employees, for 20% of the collective share.

*Note on Q2 2021 results

For the two Resources targets (#4, #5), Schneider Electric is working to increase traceability in the supply chain, as well as identifying and qualifying new sources of supply. This transformation entails deep changes on product and packaging design and procurement contracts. These programs, alongside similar corporate initiatives, will accelerate a deep transformation of the materials industry, with more traceability and rapid growth of green materials.

Following the completion of our yearly internal Employee Engagement survey, we registered an 81% confidence rate to report an unethical behavior. This performance will serve as a baseline and the Group targets a +10pts progress by 2025. Note that the performance of this KPI is excluded from the 2021 SSI score calculation.
